THE SMART DISPENSING SYSTEM

**XIBU TISSUEPAPER hybrid\***  
TOILET PAPER

Hygienic, safe and lockable

- Two-roll system
- The second roll drops down automatically
- Two Hagleitner rolls provide 1.900 sheets of toilet paper (equals eight conventional toilet-paper rolls)
- Unwinding brake

**XIBU TOWEL hybrid\***  
PAPER TOWEL

Innovative hybrid concept: always ready to use

- Two-roll system
- The second roll drops down automatically
- Three operating modes
- Data can always be called up
- Controllable paper consumption

**XIBU FOAM hybrid\***  
FOAM SOAP

Economical in use – easy to use

- Touchless dispensing
- Large reserve tank
- Adjustable dispensing quantity
- High yield

**XIBU AIRFRESH hybrid\***  
AIR FRESHENER

The right scent – at the right time

- Scenting can be set individually
- Refills without propellants

**XIBU SEAT DISINFECT hybrid\***  
TOILET-SEAT DISINFECTION

High-class toilet hygiene

- Disinfects and protects the toilet seat
- Maintains its value
- Touchless dispensing
- Adjustable dispensing quantity
- Large reserve tank

# You have the choice.

## hybrid

Touchless dispensing of disinfectants, cosmetics, sanitary paper – and data

- Automatic operation
- Digital refill status
- Dispenser settings are adjusted in the **XIBU app**

## analog

Manual dispensing of disinfectants, cosmetics, and sanitary paper.

- Manual operation
- Sight window shows fill status
- No power supply needed

### + \*XIBU analog

**XIBU PAPERBOX vacuum hybrid\***  
WASTE BIN

with vacuum function

- 40 % more filling volume thanks to vacuum system
- Space for reserve roll in the lid

Dispensers marked with an asterisk\* are available in both an automatic (hybrid) and a manual (analog) version.

# Your energy your choice

XIBU dispensers can be powered in three ways: by battery, AC adapter, or 'energy box'. Pick and choose.

## rechargePOWER

- The rechargePOWER is a storage battery. When the battery is empty, two rechargePOWER batteries can be recharged in the powerSTATION. With the powerSTATION extension, up to eight batteries can be recharged simultaneously.

## powerPACK ADAPTER hybrid

- The powerPACK ADAPTER hybrid is a power supply unit, which connects XIBU dispensers directly to the electrical grid. The adapter can either be surface- or flush-mounted.

## energyBOX S/M/L

- Choosing the energyBOX means opting for a sustainable and innovative energy solution. Hagleitner will collect empty energyBOXes and reprocess them in an eco-friendly way.

# The digital world of Hagleitner

## Networked disinfection and hygiene

## The digital washroom

## XIBU app

Monitor dispensers from the palm of your hand

A glimpse at your smart phone suffices, and valuable dispenser data will be at your fingertips: data on fill levels, energy supply, and maintenance requirements. Here, you can adjust dispenser settings as you please.

## senseMANAGEMENT

Your networked dispenser monitoring tool

XIBU hybrid dispensers are IoT devices; they transmit data 24/7. senseMANAGEMENT provides an overview of all registered dispensers. individual information about location, fill level, energy status, and maintenance requirement; moreover, it shows, how often a dispenser has been operated, how many refills have been used. This makes hygiene documentable.

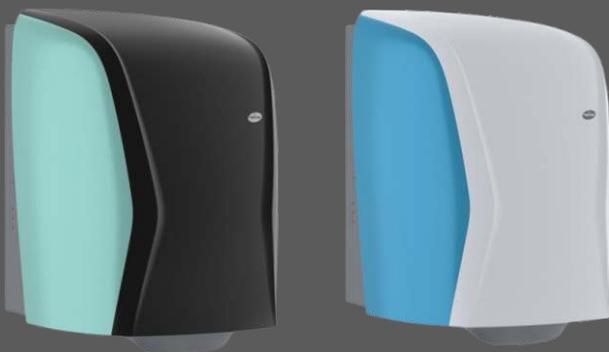

Create consumption statistics to capture the location, fill level, energy status and service requirement at a glance.

# XIBU Designer

Your room  
your design

Because life is colorful

Hygiene is not meant to impose itself, but rather be inviting – appealing, pleasing, welcoming. Hagleitner can give you a unique tool for this very purpose: the XIBU Designer. The dispenser front panel is available in two colors: white and black. The side panels of every XIBU dispenser can be adapted from a wide range, with over 1,000 designs to choose from. For the side panels, 213 RAL colors are available in matt single color lacquer; alternatively, there are more than 800 patterns (water transfer printing) – from leopard print to walnut wood to green marble to camouflage; in fact, there is hardly a pattern that is not available.

## Hygiene for the environment

Greenovative® is Hagleitner's sustainability strategy. Raw materials are eco-certified, highly concentrated formulas save plastic, system refills reduce emissions, plastic is recycled, dispenser data conserves resources. Energy-efficient production is carried out at one location. Sustainability, digitisation and innovation are intertwined, resulting in Greenovative hygiene. The Greenovative Circle from Hagleitner proves that sustainability in practice works as an integrated whole.
