Keeping the world
Smelling fresh
Since 1971

Product contains
billions of bio-actives
enzymes that
consume odors
at the source

Think-Hygiene™

MADE IN U.S.A

95% of our products
are manufactured in
Perrysburg, Ohio.
We are proud to be
family-owned and
globally-known.

SUSTAINABILITY

Caring for our planet is at the
core of everything we do.
All of our urinal screens
Contain 5-10% recycled
material and our liquids are
non-toxic and biodegradable.
We also offer the Industry's only
closed-loop recycling program.

PRODUCT INNOVATION

By focusing solely on
odor control and air care
products, we understand and
master the critical details
that competitors miss
and we have the patents
to prove it.

BEST COST IN USE

Fresh manufactures not only
the most innovative
products, but the easiest to
use. This, combined with
best-in-class category
management, means best
cost-in-use and greater
profitability.

THE POWER OF FRAGRANCE

Fragrance is a great way to enhance environments and user experiences. Smell is our strongest sense, as it's the only one directly tied to the brain.

Olfactory bulbs are part of the brain's limbic system, which is related to memory, learning, creativity, and emotion. Numerous studies have shown that fragrance can affect mood and behaviour. For instance, lavender has calming properties. Fresh Products offers a wide range of proprietary fragrances, scientifically formulated for the unique specifications of each application.

Your energy your choice

XIBU dispensers can be powered in three ways: by battery, AC adapter, or 'energy box'. Pick and choose.

rechargePOWER

The rechargePOWER is a storage battery. When the battery is empty, two rechargePOWER batteries can be recharged in the powerSTATION. With the powerSTATION extension, up to eight batteries can be recharged simultaneously.

powerPACK ADAPTER hybrid

The powerPACK ADAPTER hybrid is a power supply unit, which connects XIBU dispensers directly to the electrical grid. The adapter can either be surface- or flush-mounted.

energyBOX S/M/L

Choosing the energyBOX means opting for a sustainable and innovative energy solution. Hagleitner will collect empty energyBOXes and reprocess them in an eco-friendly way.

XIBU app

Monitor dispensers from the palm of your hand

A glimpse at your smart phone suffices, and valuable dispenser data will be at your fingertips: data on fill levels, energy supply, and maintenance requirements. Here, you can adjust dispenser settings as you please.

senseMANAGEMENT

Your networked dispenser monitoring tool

XIBU hybrid dispensers are IoT devices; they transmit data 24/7. senseMANAGEMENT provides an overview of all registered dispensers. Individual information about location, fill level, energy status, and maintenance requirement; moreover, it shows, how often a dispenser has been operated, how many refills have been used. This makes hygiene documentable.

Create consumption statistics to capture the location, fill level, energy status and service requirement at a glance.

XIBU Designer

Your room your design

Because life is colorful

Hygiene is not meant to impose itself, but rather be inviting– appealing, pleasing, welcoming. Hagleitner can give you a unique tool for this very purpose: the XIBU Designer. The dispenser front panel is available in two colors: white and black. The side panels of every XIBU dispenser can be adapted from a wide range, with over 1,000 designs to choose from. For the side panels, 213 RAL colors are available in matt single color lacquer; alternatively, there are more than 800 patterns (water transfer printing) – from leopard print to walnut wood to green marble to camouflage; in fact, there is hardly a pattern that is not available.

Hygiene for the environment

Greenovative® is Hagleitner's sustainability strategy. Raw materials are eco-certified, highly concentrated formulas save plastic, system refills reduce emissions, plastic is recycled, dispenser data conserves resources. Energy-efficient production is carried out at one location. Sustainability, digitisation and innovation are intertwined, resulting in Greenovative hygiene. The Greenovative Circle from Hagleitner proves that sustainability in practice works as an integrated whole.
